# AXIS Body Worn Manager Pro
Central control of body worn systems

AXIS Body Worn Manager Pro is a Windows® application that makes it easy to manage and maintain large, distributed body worn systems centrally. It offers integration with Microsoft® Active Directory, so user information is kept up-to-date automatically. AXIS Body Manager Worn Pro lets you comply with the most stringent security rules and regulations: Use it in a closed network, host it on your own premises, and make sure your body worn system is always updated to the latest AXIS OS release as soon as it becomes available.

> **Fast, cost-effective management**

> **Efficient upgrades across sites**

> **Microsoft Active Directory integration**

> **Easy one-time system setup**
